

## XPFLOW Royalty Management

XPFLOW Royalty Management is part of the XPFLOW end to end suite of web based applications for brand asset management, enabling globally dispersed stakeholders to work collaboratively and securely.

XPFLOW Royalty Management helps manage Royalties and Payments leading to quicker revenue realization. Key Features of the product are:

### Integrated with Contract Management

- Integrated with XPFLOW Contract management module
- API integration with other Contract Management Applications
- Light Weight Contract management Module included as part of XPFLOW Royalty Management

### Configurable Royalty Templates

- Configurable Royalty calculations based on multiple configurable attributes
- Royalty calculations embedded in MS-Excel for easy upload and management
- Multiple Royalty Calculation templates available

### Configurable Sales Data Input Interface

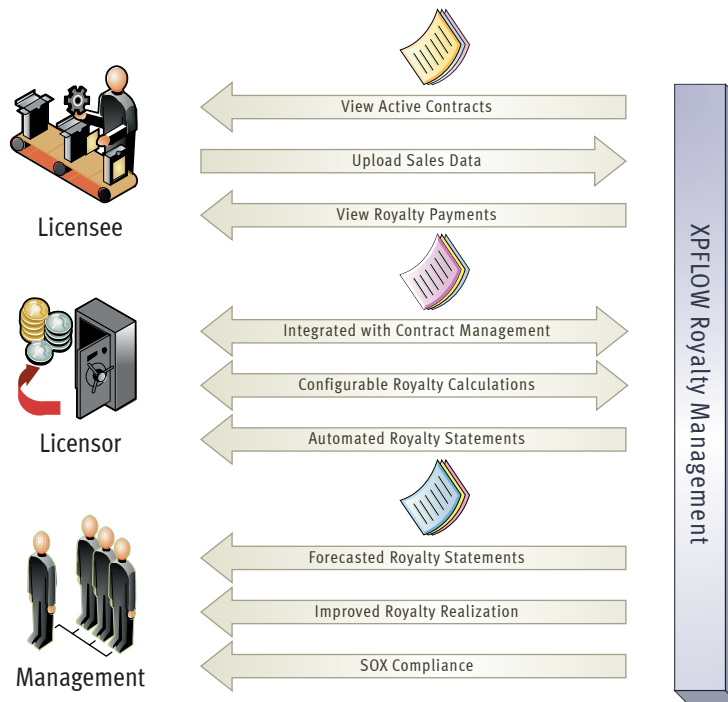

- Configurable forms that help licensees upload Sales Data to XPFLOW for Royalty Calculations
- Rights Management ensures that only users with appropriate access will be able to upload sales data
- Uploaded Sales Data is used for Royalty Calculations based on the Royalty agreement defined in the contract

### Searching and Reporting

- Automated generation of Royalty Statements
- Comprehensive Auditable Reporting
- Forecasted Royalty Reporting
- Configurable reports allowing users to choose fields in a report
- Full text searches and traditional field based searches
- Supports Predefined reports and Customizable reports

### Alerting and Notification

- Supports e-mail notifications and online alerts based on royalty payment dates, action items and based on any other field
- Notifications can be setup based on certain user actions or based on time or a combination of both
- All notifications are recorded within the system

## Integrated with Accounting Products

- Integrated with Quick Books
- API based Integration with other accounting packages and back end systems
- Ability to export data in multiple formats for data upload to various accounting systems
